GOALS

At Fayetteville First Preschool we help children reach their full potential by building positive relationships with our students, families, and community. By using our knowledge of child development, we provide learning through play experiences that keep the children engaged and excited for more. Our environment is grounded in Christian beliefs, and we seek to demonstrate Christ's constant love so our children will feel safe, secure, and respected every day.

ABOUT US

TEACHING

Children learn best when they are invested in the task at hand. By working pre-academic skills into everyday play, we ensure our students are gaining the skills necessary for future success.

Our teachers provide environments and activities that encourage children to develop motor skills and language skills, practice problem solving and promote positive social interactions. Research has shown that the mastery of these skills is a strong indicator of future academic success.
